Accenture Strategy & Consulting

Tuborg Boulevard 12, 2900 Hellerup

Dear Hiring Team at Accenture,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Public Health Science at KU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Management Consulting Analyst role sits.

I am a public health graduate with a strong analytical foundation and a passion for using data and technology to improve healthcare delivery. My master's research focuses on AI-supported clinical decision tools, and my work at the Danish Health Data Authority has given me practical insight into how policy, data, and operations interact in the public sector.

My most recent role as Student Assistant, Health Analytics at Danish Health Data Authority has shaped my interest in this work in concrete ways. Performed register-based analyses on chronic disease prevalence. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What attracts me to Accenture's consulting practice is the combination of strategic and implementation work for some of the largest organisations in the Nordics. The opportunity to apply hands-on problem solving in real client environments, while still developing depth in the areas I care most about, is rare — and exactly what I am looking for as I move from study into a full-time role.

I am open to working across Accenture Consulting's Industry practices (Financial Services, Resources, Life Sciences, Consumer Goods & Services, Health & Public Services) and Functional practices (Talent & Organization, Supply Chain & Operations). That said, my background and interests align particularly with the **Health & Public Services** practice, and I would welcome the opportunity to be considered for it as a primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Management Consulting Analyst team.

Best regards,

Sofie Bjerring
