Dear Accenture Strategy & Consulting Hiring Team,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Pharmaceutical Sciences at KU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Management Consulting Analyst role sits.

I am a pharmaceutical sciences graduate with hands-on R&D; experience at Novo Nordisk and a growing interest in how technology and AI are reshaping drug development. I am drawn to consulting because I want to operate at the interface between pharma science and strategic decision making, helping life sciences companies navigate digitalisation and operational change.

My most recent role as R&D; Student Researcher at Novo Nordisk has shaped my interest in this work in concrete ways. Supported formulation development for a new injectable product. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What attracts me to Accenture's consulting practice is the combination of strategic and implementation work for some of the largest organisations in the Nordics. The opportunity to apply hands-on problem solving in real client environments, while still developing depth in the areas I care most about, is rare — and exactly what I am looking for as I move from study into a full-time role.

I am open to working across Accenture Consulting's Industry practices (Financial Services, Resources, Life Sciences, Consumer Goods & Services, Health & Public Services) and Functional practices (Talent & Organization, Supply Chain & Operations). That said, my background and interests align particularly with the **Life Sciences** practice, and I would welcome the opportunity to be considered for it as a primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Management Consulting Analyst team.

Kind regards,

Mathias Skovgaard
