PROFILE

ITKO master's student at Aarhus University combining business communication, system development and digital transformation. My role at Arla Foods has given me hands-on experience translating business needs into IT solutions across markets, and I have built a strong appreciation for the change-management side of consulting. I am especially interested in consumer goods, where digitalisation directly meets customer experience.

EDUCATION

MSc in Information Technology, Communication and Organisation (ITKO) 2024-2026
