Dear Accenture Strategy & Consulting Hiring Team,

I am writing to apply for the Strategy Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Engineering – Mathematical Modelling and Computation at DTU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Strategy Analyst role sits.

I am a quantitative master's student at DTU specialising in mathematical modelling, optimisation and machine learning. My work at Microsoft and at the AI lab at DTU Compute has taught me how to translate complex models into decisions that businesses can act on. I want to apply this in strategy consulting, where Data & AI is becoming the lens through which most strategic problems are now framed.

My most recent role as Research Intern, Applied AI at Microsoft has shaped my interest in this work in concrete ways. Worked on retrieval-augmented generation systems for enterprise search. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What draws me to Accenture Strategy is the chance to work where corporate strategy and technology meet — across industries, with senior stakeholders, and with the analytical rigour I have built throughout my degree. The Nordic Strategy community's emphasis on diverse perspectives and continuous development matches the kind of environment in which I do my best work.

At Accenture Strategy, I would welcome being considered across Technology Strategy & Advisory, CFO & Enterprise Value, Industry Strategy, and Data & AI. Given my profile and interests, I am especially drawn to the **Data & AI** practice and would value being considered for it as my primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Strategy Analyst team.

Kind regards,

Emil Sandahl
