

Harper Russo

Dear Recruitment Team,

I am pleased to submit my application for the Management Consulting Analyst - Graduate Position at Accenture Strategy & Consulting. With a background in accounting, hands-on experience across bookkeeping, tax-related work, budgeting, and financial analysis, and a strong interest in helping organizations improve performance, I am excited by the opportunity to begin my consulting career in a role that combines analysis, collaboration, and implementation.

What attracts me to Accenture is the opportunity to work on complex client challenges in environments where both business understanding and technology-enabled transformation matter. I am motivated by work that goes beyond maintaining current processes and instead focuses on finding better ways of operating. My experience in accounting has trained me to work carefully with numbers, assess financial information, identify areas for improvement, and support decisions through structured analysis. At the same time, I have developed an appreciation for how important communication and cross-functional collaboration are when turning insight into action.

In my previous roles, I have supported accounting operations across areas such as bookkeeping, tax filing, data entry, budgeting, and business assessments. These experiences have strengthened my attention to detail, commercial awareness, and ability to work reliably under deadlines. They have also shown me how financial processes are closely linked to broader business performance and operational effectiveness. This broader perspective is one of the reasons I am especially interested in management consulting.

I believe I would bring a combination of professionalism, analytical discipline, and a strong client-oriented mindset to Accenture. I enjoy working in teams, learning quickly, and taking ownership of my responsibilities. I am also motivated by environments where expectations are high and where I can continue building new capabilities through exposure to different industries, stakeholders, and project types.

If I were to indicate a practice preference, I would be especially interested in Financial Services and Consumer Goods & Services. These areas align well with my finance background and my interest in understanding how businesses can improve efficiency, strengthen performance, and adapt to changing market conditions. That said, I would be excited to contribute across Accenture Consulting and to develop wherever the firm's needs and project opportunities are strongest.

Thank you for your time and consideration. I would greatly value the opportunity to contribute to Accenture's consulting practice and to further discuss how my profile and motivation align with the Management Consulting Analyst role.

Kind regards,
Harper Russo
