

Thomas Johnson

Dear Recruitment Team,

I am writing to apply for the Management Consulting Analyst - Graduate Position at Accenture Strategy & Consulting. With experience in investment banking, a strong academic background in economics, and extensive exposure to financial analysis and high-stakes client work, I am eager to bring my analytical and commercial skill set into a consulting role focused on solving complex business challenges and delivering measurable results.

What appeals to me most about Accenture is the opportunity to work at the intersection of business strategy, implementation, and technology-driven transformation. In investment banking, I have developed strong capabilities in valuation, transaction analysis, financial modeling, and presentation development. I have worked with senior stakeholders, supported client-facing projects, and contributed to engagements that required both analytical depth and clear communication. These experiences have taught me how to work under pressure, structure complex information, and produce high-quality output in demanding environments.

At the same time, I am increasingly motivated by work that extends beyond transaction support and into broader business transformation. I am interested in helping organizations navigate change, improve performance, and make strategic decisions that are implemented effectively. Consulting stands out to me because it offers the opportunity to tackle a wider range of business issues while working in collaborative, multidisciplinary teams and staying close to clients throughout the problem-solving process.

My background in economics has further strengthened my interest in markets, competition, and strategic decision-making. I enjoy rigorous analysis, but I am equally motivated by the challenge of turning insight into action. I believe I would bring a strong combination of quantitative ability, commercial awareness, and professional maturity to Accenture. I am also comfortable communicating with different stakeholders and contributing to presentations and reports in ways that are both precise and persuasive.

If I were to indicate a preference, I would be especially interested in Financial Services, given my finance experience and strong interest in strategic and operational challenges within the sector. That said, I would be excited to contribute more broadly across Accenture Consulting and to continue developing in a role that combines intellectual challenge with tangible client impact.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience, motivation, and consulting aspirations align with the Management Consulting Analyst role at Accenture.

Kind regards,  
Thomas Johnson
