

Lee Batla

Dear Hiring Team,

I am excited to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a background in business analysis and several years of experience working with software-related business intelligence, requirements gathering, and cross-functional stakeholders, I am motivated by the opportunity to bring my analytical and implementation-focused experience into management consulting.

In my previous roles, I have worked closely with business users, IT teams, and project stakeholders to define requirements, support data-related initiatives, and contribute to process and system improvements. These experiences have strengthened my ability to translate business needs into structured solutions, work across disciplines, and stay focused on how technology can create real value for an organization. I am particularly motivated by roles that combine analysis, client interaction, and execution.

What attracts me to Accenture is the chance to work on transformation projects that are both strategic and hands-on. Given my experience with operations, systems, and business process improvement, I would especially welcome being considered for Supply Chain & Operations. I believe this area would allow me to contribute with both my business analysis background and my motivation to help organizations implement meaningful change.

I would value the opportunity to join Accenture and contribute with a collaborative mindset, strong problem-solving skills, and a genuine enthusiasm for client work. Thank you for your consideration.

Yours sincerely,

Lee Batla
