Accenture Strategy & Consulting

Dear Hiring Team,

I am applying for the Strategy Analyst Graduate Position because I am motivated by the opportunity to work with strategic questions that are closely linked to execution and measurable value creation. What particularly appeals to me about Accenture Strategy is the combination of high-level problem solving and the practical work required to move organizations forward. I am especially drawn to the role because it allows room for both structured analysis and close collaboration with stakeholders across the business.

In my current PMO role at Arla Foods, I support a complex transformation program by preparing governance material, tracking actions and dependencies, and helping maintain momentum across multiple workstreams. This has taught me how much discipline and coordination it takes to turn strategic ambition into real change. In parallel, my earlier roles in commercial excellence and operations have given me experience with performance data, cost-oriented analysis, and how industry context shapes what is strategically possible.

I believe this combination makes me well suited for strategy work that requires both analytical structure and practical judgement. I enjoy creating clarity, building overview, and helping teams move from discussion to action. Academically, I have built a strong business foundation with a focus on strategy execution, finance, and operations, and I have consistently looked for opportunities to apply that knowledge in real organizational settings.

If possible, I would be especially interested in being considered for Industry Strategy and CFO & Enterprise Value. These areas match both my interest in transformation and my motivation to understand how organizations create and protect value beyond purely theoretical analysis. I would be excited by the opportunity to contribute to Accenture's Nordic Strategy community and continue developing in an environment with both ambitious colleagues and strong learning opportunities.

Kind regards,

Katrine Møller
