Dear Accenture Strategy & Consulting,

What motivates me about the Strategy Analyst role is the possibility of learning how strategic decisions are shaped in industries undergoing major change. My background is more engineering-oriented than purely strategic, but I see that as a strength when the challenge is to connect technical realities with business priorities and implementation choices.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, including Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for Industry Strategy. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of industry specialist + transformation orchestrator capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for your time and consideration. I would be very motivated to discuss how I could contribute and learn in the role.

Kind regards,

Rasmus Kold
