
EMIL ROSENKILDE

Strategy Analyst Graduate Candidate | Persona mix: Tech Translator / Applied Technical Specialist

Lyngby, Denmark | +45 31 77 42 18 | emil.rosenkilde@example.com | linkedin.com/in/emilrosenkilde

Profile

Analytical graduate candidate with a strong technical foundation and a clear interest in how data, AI, and automation can be turned into meaningful business decisions. Experienced in communicating technical findings to non-technical stakeholders and in developing structured problem-solving approaches.

Education

MSc in Business Analytics | Technical University of Denmark (DTU) | 2024-2026

Current GPA: 10.7/12 Focus on analytics, machine learning, optimization, and decision support.

BSc in Computer Science | IT University of Copenhagen | 2021-2024

GPA: 10.1/12 Projects in software development, data engineering, and AI-enabled applications.

Professional Experience

Student Data Analyst | Novo Nordisk | Sep 2025 - Present

- Built analytical models and dashboards to support decision-making in a process improvement context.
- Translated technical output into concise recommendations for operational stakeholders.
- Contributed to data quality and automation discussions in a cross-functional team.

AI Intern | Dawn Health | Jan 2025 - Jun 2025

- Explored GenAI use cases and helped evaluate where AI could create value in product and internal workflow settings.
- Created prototypes and structured findings for business and product stakeholders.

Teaching Assistant | DTU Compute | Aug 2024 - Dec 2024

- Supported courses in data analysis and programming, explaining technical concepts in an accessible way.

Selected Project Experience

- Developed a predictive model for operational demand patterns and presented implications for planning decisions to a mixed technical/business audience.
- Built a proof-of-concept GenAI workflow for internal knowledge retrieval and documented technical limitations, risks, and business relevance.

Key Skills

Data & technical: Python, SQL, Power BI, machine learning, optimization, experimentation, APIs
