- Computational thinking
- Digital business development
- Text production and translation: Danish-English and English-Danish
- Strategic communication
- Digital communication

PROFILE

I am an IT and Communications student with a strong interest in digital transformation. After earning my Bachelor's degree in International Business Communication in 2023 from Aarhus University, I spent six months in Melbourne working in National Australia Bank. Having grown up between New York and the north of Denmark, the Australian experience enhanced my multicultural background, independence, and global mindset. In 2024, I embarked on my Master's of Science in Information Technology, Communication and Organization from Aarhus University, which will be completed in July 2026. The programme integrates technical, organisational, and managerial perspectives on IT and explores how these disciplines can be combined to support the development and implementation of technology.
