Dear Accenture Strategy & Consulting,

What appeals to me most about Accenture Strategy is that the role does not force a choice between a technical and a business profile. My background is broader than a pure strategy track, but that is exactly why I believe I could contribute with a combination of analytical depth, curiosity for technology, and a practical understanding of how ideas become workable solutions.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, whether that involves Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for Data & AI, though I would also be excited by Technology Strategy & Advisory. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of tech translator + applied technical specialist + data & ai capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for considering my application. I would be excited to contribute to Accenture's Nordic Strategy community and to continue developing in an environment where curiosity, problem solving, and teamwork are valued highly.

Kind regards,

Mahmoud El-Sayed
