Dear Accenture Strategy & Consulting,

I am applying for the Strategy Analyst role because I want to start my career in an environment where expectations are high and where I can strengthen both my analytical toolkit and my understanding of how strategic decisions are made in practice. My profile may look broader and less polished than some candidates', but I believe I bring persistence, curiosity, and a genuine motivation to improve quickly.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, including Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for Industry Strategy or CFO & Enterprise Value. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of tech strategist + broad generalist capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for your time and consideration. I would be very motivated to discuss how I could contribute and learn in the role.

Kind regards,

Victor Gade
