Dear Accenture Strategy & Consulting,

While my background is not from a classic finance or engineering track, I believe it is highly relevant for strategy consulting in contexts where regulation, institutions, and implementation matter. I am motivated by questions of how organisations can transform responsibly and effectively when technology, governance, and stakeholder expectations are all changing at the same time.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, whether that involves Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for Industry Strategy, with a strong interest in Technology Strategy & Advisory in the public sector. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of industry specialist + tech strategist + public sector angle capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for considering my application. I would be excited to contribute to Accenture's Nordic Strategy community and to continue developing in an environment where curiosity, problem solving, and teamwork are valued highly.

Kind regards,

Nanna Rahbek
