Dear Accenture Strategy & Consulting,

I am drawn to the Strategy Analyst role because it offers the chance to work with the full journey from analysis to action. In particular, I am interested in roles where financial logic, technology choices, and transformation execution need to be brought together into a coherent recommendation for the client.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, whether that involves Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for CFO & Enterprise Value, though I am also strongly interested in Technology Strategy & Advisory. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of tech strategist + cfo value + tech translator capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for considering my application. I would be excited to contribute to Accenture's Nordic Strategy community and to continue developing in an environment where curiosity, problem solving, and teamwork are valued highly.

Kind regards,

Helena Drachmann
