Accenture Strategy & Consulting

Re: Application – Management Consulting Analyst (Graduate, September 2026)

Copenhagen, 21 May 2026

Dear Hiring Manager,

I am applying for the Management Consulting Analyst role at Accenture Strategy & Consulting, starting September 2026. I am an MSc Management Engineering student at DTU, where I combine an engineering foundation with a strategic and organisational focus. My internship at Rambøll Management Consulting has confirmed my ambition to build a career in management consulting, and I am drawn to Accenture both for the scale and diversity of its client portfolio in the Nordics and for its commitment to technology-enabled transformation.

At Rambøll, I worked on client engagements spanning public administration and life sciences, including an organisational restructuring project at a regional hospital and a process improvement assignment for the Danish Medicines Agency. These projects required me to diagnose complex operational problems, design and facilitate stakeholder workshops with clinical and administrative staff who often had competing priorities, and produce clear, actionable recommendations under tight delivery timelines. I was regularly commended for the clarity of my written deliverables and my ability to build trust with client contacts quickly.

My master's thesis examines how large Danish life sciences companies have attempted to scale agile methodologies across traditional hierarchical structures – a question that sits at the core of the Talent & Organisation challenges many of Accenture's clients face. Through interviews with transformation leaders at Novo Nordisk, Lundbeck, and Leo Pharma, I have developed a nuanced understanding of the organisational and cultural barriers that determine whether technology-enabled change programmes succeed or fail.

I am particularly interested in Accenture's Life Sciences and Talent & Organisation practices, where I believe my research expertise, practical consulting experience, and engineering problem-solving mindset are most directly relevant. At the same time, I am genuinely excited by the breadth of Accenture's practice areas and see enormous value in exposure to diverse industries early in my consulting career.

I look forward to the opportunity to meet the team at the bootcamp in Copenhagen in November 2025. I am prepared to engage fully with both the case interview and the personal fit interview, and I am confident that a conversation will confirm the strength of my application. Thank you for your time and consideration.

Yours sincerely,

Oliver Møller-Hansen
