

Oliver Møller-Hansen

MSc Management Engineering | Technical University of Denmark (DTU)

Lyngbyvej 14, 2. sal, 2100 Copenhagen Ø

oliver.moller@student.dtu.dk · +45 60 88 42 15 · linkedin.com/in/oliver-moller-hansen

Profile

Engineering graduate with a management specialisation, combining strong quantitative problem-solving skills with a natural affinity for business strategy and organisational design. Experienced in process improvement, data analysis, and team leadership through engineering consultancy and public sector roles. Interested in applying an engineering mindset to complex business challenges across Accenture's Industry and Functional practices, with particular enthusiasm for the Talent & Organisation and Life Sciences practices.

Education

MSc Management Engineering (Teknologiledelse)

Technical University of Denmark (DTU) · 2024 – 2026 (expected June 2026)

Specialisation in innovation management and operations strategy. Thesis: 'Scaling Agile Across Hierarchical Organisations: Evidence from the Danish Life Sciences Sector'. GPA: 10.9 (12-scale). Member of the DTU Management Engineering Student Council.

BSc Civil Engineering

Technical University of Denmark (DTU) · 2021 – 2024

Major in Construction Management and Infrastructure. GPA: 10.5. Project award for final-year group project on BIM-enabled project delivery for hospital construction in the Capital Region.

Professional Experience

Junior Management Consultant | Rambøll Management Consulting

Jan 2025 – Jul 2025 · Copenhagen, Denmark

- Supported three client engagements in public administration and life sciences, including an organisational restructuring project for a regional hospital and a process improvement assignment for the Danish Medicines Agency.
- Designed and facilitated ten stakeholder workshops with clinical staff, department heads, and administrative management; produced workshop reports and recommendations documents.
- Developed a process maturity assessment tool (Excel-based) used across two client organisations to baseline operational capabilities ahead of a transformation programme.
- Authored client-facing deliverables (strategy papers, implementation roadmaps, and progress reports) reviewed and approved by engagement managers with minimal revision.

Project Engineering Intern | Aarsleff Group A/S

Jun 2023 – Sep 2023 · Viby J, Denmark

- Supported the project management office on a DKK 340 million infrastructure contract for the Copenhagen Metro extension.
- Maintained project schedules and risk registers; flagged early schedule deviations that enabled proactive client communication.
- Prepared internal progress reports and presentation materials for monthly client and board updates.

Student Worker – Strategy & Analysis | Danish Business Authority (Erhvervsstyrelsen)

Sep 2022 – May 2023 · Copenhagen, Denmark

- Contributed to a regulatory burden reduction project commissioned by the Ministry of Business; collected and analysed data from 120 Danish SMEs.

- Drafted sections of a ministerial briefing note on digital compliance requirements subsequently published by the Authority.
