

Ryan Michael

Dear Hiring Team,

I am excited to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a background in accounting and finance, a master's degree in business administration, and hands-on experience supporting financial reporting, audits, budgeting, and compliance activities, I am motivated by the opportunity to apply my analytical foundation in a broader consulting context where business challenges are solved through structured problem-solving and close collaboration with clients.

In my recent accounting roles, I have worked with financial information in a practical and detail-oriented way, from preparing reports and supporting audits to verifying payables and receivables, monitoring bank accounts, and helping ensure compliance with regulations. These responsibilities have strengthened my ability to work accurately with complex information, communicate recommendations clearly, and support decision-making in environments where quality and reliability matter. I believe those skills would translate well into consulting projects that require both analytical discipline and client-focused execution.

What especially attracts me to Accenture is the combination of strategy and implementation. I am motivated by roles where analysis leads to action, and where recommendations are translated into measurable improvements for the client. Given my profile, I would particularly welcome being considered for Financial Services, where I believe my finance background, business understanding, and structured working style could allow me to contribute from day one while continuing to grow as a consultant.

I would value the opportunity to join a collaborative and high-performing team at Accenture, where I can contribute with diligence, curiosity, and a strong willingness to learn. Thank you for considering my application.

Yours sincerely,

Ryan Michael
