

Gary Crelia

Dear Hiring Team,

I am writing to express my interest in the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a background that combines business education with consulting experience in requirements planning, process analysis, and stakeholder-facing work, I am excited by the opportunity to contribute to projects where structured problem-solving leads to real and lasting client impact.

In my previous consulting and analyst roles, I have supported business planning, feasibility work, process reviews, and coordination across multiple stakeholders. These experiences have strengthened my ability to synthesize information, communicate clearly, and move between analysis and execution. I have also learned the importance of building trust with both internal teams and clients when driving change, especially when projects involve organizational alignment, prioritization, and follow-through across different functions.

What draws me to Accenture is the scale and variety of the work, combined with the opportunity to continue developing as a consultant in a high-performing environment. Based on my experience, I would be especially interested in Talent & Organization, where business transformation is closely linked to people, operating models, and stakeholder engagement. At the same time, I would be happy to contribute wherever there is a need for strong analysis, communication, and implementation support.

I would be grateful for the opportunity to contribute to Accenture as a Management Consulting Analyst and to continue building my consulting capabilities in a collaborative setting. Thank you for your consideration.

Yours sincerely,

Gary Crelia
