

Hanna Persson

Dear Hiring Team,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a degree in business and management from Lund University, international exposure, leadership experience, and a strong interest in performance and problem-solving, I am excited by the opportunity to contribute to client-facing projects at the intersection of business and technology.

My experience has given me a solid foundation in stakeholder communication, reporting, coordination, and structured execution. In my management role, I worked with business plans, performance monitoring, resourcing, and day-to-day coordination, which taught me the importance of combining analytical thinking with action and collaboration. In parallel, my involvement in student organizations helped strengthen my leadership, communication, and ability to engage others around common goals.

I am particularly attracted to Accenture because of the opportunity to work on both strategic and implementation-oriented projects in a high-performing team environment. Based on my profile, I would especially welcome consideration for Consumer Goods & Services, where business understanding, market orientation, and client collaboration are important, though I would also be enthusiastic about broader opportunities across the consulting organization.

I would value the opportunity to contribute with energy, structure, and a strong willingness to learn as I begin my consulting career. Thank you for considering my application.

Yours sincerely,

Hanna Persson
