

Andrew Clark

Dear Hiring Team,

I am pleased to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a background in project management and experience across aerospace, defense, automotive, engineering, and manufacturing environments, I am motivated by the opportunity to contribute to consulting projects where operational improvements, stakeholder coordination, and disciplined execution are central to client success.

In my previous roles, I have worked with project planning, schedule management, cost control, risk management, process improvement, and cross-functional coordination. These experiences have taught me how to structure complex workstreams, manage competing priorities, and keep teams aligned around clear objectives. I enjoy environments where analytical thinking must be paired with practical implementation, and where improvements are only valuable if they can be successfully delivered in practice.

What especially attracts me to Accenture is the combination of problem-solving, client collaboration, and technology-enabled transformation. Given my operational and project-oriented experience, I would be particularly interested in Supply Chain & Operations, where I believe my background in delivery, coordination, and continuous improvement would be especially relevant.

I would welcome the opportunity to contribute to Accenture with a strong work ethic, a collaborative mindset, and a genuine motivation to keep learning in a fast-paced consulting environment. Thank you for your time and consideration.

Yours sincerely,

Andrew Clark
