

Isadore Hilpert

Dear Hiring Team,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting. With a strong background in SAP development, solution support, and cross-functional collaboration, I am motivated by the opportunity to bring my technology and business process experience into a consulting role focused on transformation and implementation.

Across my experience, I have worked with business analysts, end users, and project teams to design, develop, test, and support SAP-related solutions. This has given me practical exposure to process improvement, issue resolution, stakeholder coordination, and the realities of implementing technology in complex business environments. I have particularly enjoyed assignments where technical work is closely tied to operational outcomes, and where success depends on understanding both user needs and system capabilities.

What appeals to me about Accenture is the opportunity to work on large-scale client challenges where technology is used to improve processes and enable change. Given my background, I would especially welcome consideration for Supply Chain & Operations, where enterprise systems, implementation work, and operational transformation often intersect. I am eager to build on my experience while developing a broader consulting perspective.

I would be grateful for the opportunity to contribute to Accenture with a structured approach, strong technical-business understanding, and a clear motivation to learn and grow in consulting. Thank you for your time and consideration.

Yours sincerely,

Isadore Hilpert
