Application for Management Consulting Analyst - Graduate Position

Dear Recruiting Team,

I am writing to apply for the Management Consulting Analyst - Graduate Position at Accenture Strategy & Consulting. With a degree in Business Administration from the University of California, Berkeley, a strong academic record, and experience in financial analysis, forecasting, and reporting, I am motivated by the opportunity to contribute to consulting projects that require structured thinking, analytical rigor, and close collaboration with stakeholders.

In my previous finance analyst roles, I have worked with reporting, tax-related documentation, forecasting tools, financial models, and cross-functional coordination with operations and management teams. These experiences have strengthened my ability to analyze complex information, communicate clearly, and support decision-making in dynamic environments. I have also developed a strong appreciation for how performance improvements often depend on combining sound analysis with practical execution and alignment across teams.

What particularly attracts me to Accenture is the opportunity to work on projects where business challenges are addressed through a combination of analysis, communication, and implementation. Based on my profile, I would be especially interested in Financial Services or Consumer Goods & Services. I am interested in how organizations can improve performance, efficiency, and decision quality, especially when technology and data are part of the solution. I believe my finance background would allow me to contribute effectively while continuing to broaden my understanding of technology-driven transformation.

I would bring a strong work ethic, intellectual curiosity, and a collaborative mindset. I am comfortable taking responsibility, learning quickly, and contributing to high-quality deliverables in fast-paced environments. Joining Accenture would be an exciting next step for me because it offers the chance to build on my analytical background while developing into a well-rounded consultant.

Thank you for your time and consideration. I would be very happy to discuss my application in more detail.

Sincerely,
Vince Braun
