
ANDREAS HOLMGAARD

Strategy Analyst Graduate Candidate | Persona mix: Tech Strategist / Tech Translator

Copenhagen, Denmark | +45 28 64 11 93 | andreas.holmgaard@example.com | linkedin.com/in/andreasholmgaard

Profile

Master's student with a combined business and technology profile and a strong interest in how companies translate technology agendas into practical business change. Brings experience from strategy analysis, digital use-case development, market research, and stakeholder-facing project work. Particularly motivated by projects that connect technology strategy, data, and business transformation.

Education

MSc in Digital Business Management | Aarhus University | 2024-2026

Current GPA: 10.2/12 Courses: Digital business development, project management, data-driven business analysis, system development.

BSc in International Business | Aarhus University | 2021-2024

GPA: 9.6/12 Exchange semester at ESADE, Spain. Focus on strategy, innovation, and technology-enabled business models.

Professional Experience

Student Strategy Analyst | Columbus | Aug 2025 - Present

- Supported strategy work for digital transformation and ERP-related client engagements in manufacturing and retail.
- Conducted market and competitor research and translated findings into presentation material for senior client stakeholders.
- Built early business cases for automation and process redesign initiatives.

Student Assistant, Digital Transformation | JYSK Head Office | Sep 2024 - Jul 2025

- Mapped business needs and helped scope a technology-enabled process improvement initiative across multiple markets.
- Coordinated testing and roll-out activities and documented recommendations for local stakeholders.
- Worked with KPI follow-up and translated performance data into management-ready insights.

Analyst Intern | Aarhus BSS Innovation Hub | Jan 2024 - Jun 2024

- Developed use-case descriptions for AI and analytics opportunities in SME settings.
- Interviewed stakeholders and synthesized qualitative and quantitative findings into decision material.

Selected Project Experience

- Built an opportunity assessment for AI-supported customer service workflows, including value drivers, implementation considerations, and stakeholder risks.
- Prepared workshop material for a transformation initiative focused on process simplification and operating model alignment.
