PROFILE / SUMMARY

Engineering graduate with a growing interest in strategy, efficiency improvements, and the business implications of energy transition. Interested in building a consulting career in projects where technical complexity and commercial priorities need to be connected.

EDUCATION

MSc in Energy Engineering - University of Southern Denmark

2024-2026 | Current GPA: 8.1 / 12

BEng in Mechanical Engineering - Aarhus University School of Engineering

2019-2023 | GPA: 7.6 / 12

Experience

Project Student - Semco Maritime

Oct 2024 / Present

- Tracked workstreams in a decarbonisation-related improvement project.
- Prepared summaries of technical findings for project managers and commercial colleagues.
- Assisted with benchmarking and a simple cost-reduction exercise.

Graduate Intern - Local manufacturing company

2023 / 2024

- Worked with production data, maintenance logs, and ad hoc reporting.
- Helped drive smaller process improvement tasks.

Warehouse Employee -

2017 / 2022

- Part-time employment throughout studies.

SKILLS

Technical understanding, Process improvement, Excel, Benchmarking, Cross-functional collaboration

SELECTED COURSES

Energy systems, Project management, Operations, Cost engineering, Sustainability transitions

LANGUAGES

Danish (native), English (professional)

PERSONA / FIT NOTES (for testing dataset)

Primary mix: Industry Specialist + Transformation Orchestrator. Dataset tag: weaker / mixed quality. Preferred practice area: Industry Strategy.
