
NIKOLAJ BJERRE

Strategy Analyst Graduate Candidate | Persona mix: Applied Technical Specialist / Industry Specialist

Lyngby, Denmark | +45 30 84 26 17 | nikolaj.bjerre@example.com | linkedin.com/in/nikolajbjerre

Profile

Technically strong graduate candidate with a particular interest in energy, industrial transformation, and data-driven decision support. Combines engineering depth with curiosity for commercial and strategic questions.

Education

MSc in Sustainable Energy Engineering | Technical University of Denmark (DTU) | 2024-2026

Current GPA: 10.4/12 Focus on systems analysis, modelling, optimization, and decarbonization pathways.

BEng in Mechanical Engineering | University of Southern Denmark | 2020-2024

GPA: 8.8/12 Projects in industrial systems, operations, and applied analytics.

Professional Experience

Student Analyst, Strategy & Decarbonization | Topsoe | Sep 2025 - Present

- Supported analyses related to industrial transition, technology pathways, and market implications.
- Contributed to material for internal strategic discussions and project prioritization.

Engineering & Analytics Intern | Ørsted | Jan 2025 - Jun 2025

- Worked with scenario calculations and technical-commercial analysis relevant to energy projects.
- Prepared summary material for stakeholders with both engineering and business backgrounds.

Student Worker | DTU Energy | Aug 2024 - Dec 2024

- Supported research tasks involving data analysis and modelling.

Selected Project Experience

- Built a decision model comparing alternative technology pathways and assessed strategic trade-offs across cost, feasibility, and long-term scalability.
- Completed a thesis-related project on how analytics can support strategic prioritization in energy-intensive industries.

Key Skills

Technical & quantitative: Python, MATLAB, Excel, modelling, optimization, scenario analysis

Industry understanding: Energy systems, industrial value chains, sustainability strategy, technical-commercial trade-offs

Other: Danish native, English fluent, international project collaboration

Languages & Activities

Languages: Danish (native), English (fluent).

Activities: Volunteer at engineering career fair, exchange project with TU Delft, football coach.
