

NIKOLAJ BJERRE

APPLIED TECHNICAL SPECIALIST PROFILE

+45 24 70 18 92 | nikolaj.bjerre@email.dk | linkedin.com/in/nikolajbjerre | Lyngby, Denmark

PROFILE

Technically strong graduate candidate with a solid foundation in machine learning, quantitative methods, and technical solution development. Experienced in building models, working with statistical analysis, and translating analytical methods into robust prototypes. Motivated by roles where algorithmic thinking, optimization, and technical depth are central to solving complex real-world problems.

CORE EXPERTISE

- Advanced quantitative methods
- Machine learning and modelling
- Algorithmic thinking
- Statistical analysis
- Optimization
- Technical solution development
- Systems engineering mindset

TOOLS

Python | NumPy | Pandas | scikit-learn | PyTorch | SQL
| Git | Docker (basic)

LANGUAGES

Danish (native)
English (fluent)

ADDITIONAL

Tutor

DTU | 2024 - Present
Guide new students in programming exercises and mathematical methods.

PROFESSIONAL PROFILE

Persona target: Applied Technical Specialist. This CV is intentionally written to surface keywords, educational signals, and work experience aligned with this profile while remaining realistic and coherent.

EDUCATION

MSc in Computer Science and Engineering |
Technical University of Denmark

2024-2026 Current GPA: 10.8

- Selected courses: Machine Learning, Optimization, Deep Learning, Statistical Signal Processing

BSc in Applied Mathematics | Aalborg
University

2021-2024 GPA: 10.3

- Bachelor project: Forecasting model for district heating demand using time-series analysis

WORK EXPERIENCE

Research Assistant, Applied AI | DTU Compute,
Lyngby

Sep 2025 - Present

- Built and evaluated machine learning pipelines for classification and prediction tasks using Python and standard ML libraries.
- Conducted error analysis, feature engineering, and model validation to improve performance and robustness.
- Documented technical choices and experimental findings for researchers and project stakeholders.

Data Science Intern | Energinet, Fredericia

Jan 2025 - Jun 2025

- Developed simulation and forecasting prototypes related to energy system planning.
- Worked with structured datasets, optimization logic, and statistical analysis to support technical decision-making.
- Collaborated with domain experts to ensure that models reflected practical system constraints.

Student Programmer | AAU

Feb 2024 - Dec 2024

- Implemented analytical scripts and data-cleaning workflows for academic projects involving large numerical datasets.

SELECTED PROJECTS

Selected project experience

- Built an end-to-end machine learning prototype for demand forecasting with documented feature selection, cross-validation, and error metrics.
- Completed a technical university project on constrained optimization, with emphasis on modelling assumptions and solution performance.

HIGHLIGHTS RELEVANT FOR CONSULTING ROLES

- Provides technical depth in modelling, analytics, and solution development.
- Strong fit for advanced analytics, engineering, and data-science-heavy consulting environments.
