Dear Accenture Strategy & Consulting,

I am especially interested in the Strategy Analyst position because it combines analytical work with real organisational change. In my experience, some of the most valuable strategic discussions happen where operations, finance, and technology meet, and I would be excited to build my career in that space.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, whether that involves Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for CFO & Enterprise Value or Industry Strategy. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of industry specialist + transformation orchestrator + cfo value capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for considering my application. I would be excited to contribute to Accenture's Nordic Strategy community and to continue developing in an environment where curiosity, problem solving, and teamwork are valued highly.

Kind regards,

Katrine Bruun
