Dear Accenture Strategy & Consulting,

Accenture Strategy appeals to me because it is a place where strategic thinking is expected to be evidence-based, collaborative, and implementation-oriented. I am especially motivated by the opportunity to work with problems where data and AI are not just interesting topics, but concrete enablers of better business choices.

Through my studies and experience, I have built a profile that fits the role's emphasis on strong analytical skills, research, communication, workshop preparation, and collaboration with senior stakeholders. I enjoy turning broad problem statements into structured analyses and practical next steps, whether that involves Excel-based modelling, market and competitor research, synthesis of interviews, or preparing presentation material for decision-makers.

I am particularly interested in being considered for Data & AI or Technology Strategy & Advisory. At the same time, I am attracted by the breadth of the Strategy Analyst role because it would allow me to keep developing at the intersection of business strategy and technology. I would value the opportunity to contribute with my mix of tech translator + tech strategist + data & ai capabilities while learning from experienced colleagues in a demanding and collaborative environment.

Thank you for considering my application. I would be excited to contribute to Accenture's Nordic Strategy community and to continue developing in an environment where curiosity, problem solving, and teamwork are valued highly.

Kind regards,

Signe Hviid
