Accenture

Dear Hiring Team,

I am applying for the Transformation PMO Analyst role because I enjoy the part of transformation work that turns ambition into execution: coordinating stakeholders, creating structure, and keeping momentum across parallel workstreams.

At Vestas, I currently support a transformation portfolio through governance packs, roadmap maintenance, and progress reporting. That role has strengthened my ability to translate complex activity into clear milestones, risks, and decisions. In my internship at Salling Group, I also supported change enablement and workshop coordination in a cross-functional setting, which taught me the importance of practical follow-up and value realization.

My academic background in Digital Business Management and design-oriented engineering has made me comfortable moving between business and operational perspectives. I would be excited to contribute with a structured, collaborative, and implementation-focused approach in a PMO environment.

I would welcome the opportunity to contribute with a Danish market perspective, strong communication skills in English, and a structured, collaborative approach.

Kind regards,

Katrine Holm
