WORK EXPERIENCE

Data & AI Student Assistant | JYSK, Brabrand Aug 2025 - Present

- Translated commercial and operational needs into dashboard requirements, KPI definitions, and initial automation concepts.
- Worked with stakeholders to clarify data needs, business logic, and success criteria for analytics initiatives.
- Supported AI enablement conversations by framing realistic use cases, constraints, and expected business value.

Business Analyst Intern | Netcompany, Copenhagen

Jan 2025 - Jun 2025

- Helped document system requirements and user needs in a public-sector digitalization project.
- Bridged dialogue between developers, analysts, and business stakeholders through structured requirement material and workshop summaries.
- Supported test planning and interpretation of findings from pilot activities.

Student Analyst | Start-up within GenAI tools Sep 2024 - Dec 2024

- Assessed user journeys and identified high-value opportunities for generative AI support in customer operations.
- Created simple prototypes and use-case

descriptions for internal and external stakeholders.

SELECTED PROJECTS

Selected project experience

- Designed a use-case catalogue for AI-enabled process improvements, prioritizing by feasibility, data readiness, and business value.
- Built a proof-of-concept dashboard translating raw performance data into insights relevant for non-technical decision-makers.

HIGHLIGHTS RELEVANT FOR CONSULTING ROLES

- Bridges data, systems, and stakeholder needs through clear requirements and practical use-case framing.
- Strong fit for business analysis, AI enablement, and technology-facing consulting roles.
