

Jonas Vestergaard

MSc IT & Cognition | University of Copenhagen

Nørrebrogade 112, st. th., 2200 Copenhagen N

jonas.vestergaard@ku.dk · +45 40 15 83 62 · github.com/jonasvestergaard

Profile

Technology-first graduate combining deep competences in data science, machine learning, and human-computer interaction with growing expertise in business strategy and organisational change. Experienced in translating technical deliverables into business value for non-technical stakeholders. Particularly interested in Accenture's Technology-driven consulting engagements across Consumer Goods & Services and Resources.

Education

MSc IT & Cognition

University of Copenhagen (KU) · 2024 – 2026 (expected June 2026)

Specialisation in data-intensive systems and human factors. Thesis: 'Explainability as a Trust Lever: Human-AI Decision-Making in B2B Procurement Settings'. GPA: 11.0 (12-scale). Guest lecturer in the Bachelor's course 'Data Ethics & Society'.

BSc Computer Science

University of Copenhagen (KU) · 2021 – 2024

Core coursework in algorithms, machine learning, distributed systems, and software architecture. GPA: 10.4. Final project: predictive maintenance model for industrial equipment deployed in collaboration with Grundfos A/S.

Professional Experience

Data Science Intern | Ørsted A/S – Digital & Innovation

Jan 2025 – Jun 2025 Fredericia / Copenhagen, Denmark

- Developed a machine learning pipeline for anomaly detection in offshore wind turbine sensor data, reducing manual inspection triggers by 34% in a six-month pilot.
- Collaborated with engineers, safety managers, and commercial leads to define model requirements and translate outputs into actionable maintenance scheduling recommendations.
- Presented technical findings to a mixed audience of 40 engineers and business managers; received commendation from the VP of Digital for clarity of communication.
- Participated in an internal 'Digital Maturity' assessment for two business units, contributing to the final board-level recommendation on technology investment priorities.

Software Developer (Part-time) | Pentia A/S

Feb 2023 – Dec 2024 Copenhagen, Denmark

- Developed and maintained backend services (Python/Django) for e-commerce clients in retail and fashion.
- Led integration of a new payment provider API for a major Danish fashion brand with >200k monthly active users.
- Supported client onboarding sessions and produced end-user documentation for non-technical stakeholders.

Research Assistant – Cognitive Systems | University of Copenhagen – Cognition & Communication

Sep 2022 – Jun 2023 Copenhagen, Denmark

- Conducted user studies examining how interface design affects decision quality in time-pressured environments.
- Analysed behavioural data using R and Python; contributed to a peer-reviewed conference paper (INTERACT 2023).

Skills & Competencies

Technical

Python (ML/data science)
SQL & NoSQL databases
Docker / cloud (Azure)
REST APIs / Django

Analytics & AI

Machine learning (scikit-learn)
NLP & LLM prompting
Data visualisation (Plotly/D3)
Statistical modelling (R)

Business & Consulting

Technology strategy
Structured problem-solving
Stakeholder presentations
Change management basics

Languages

Danish – Native

English – Proficient (C2)

Spanish – Intermediate (B1)

Additional

- Organiser, Copenhagen ML Meetup (monthly tech-to-business translation sessions, ~120 attendees)
- Kaggle Expert ranking; top 8% in two industry data science competitions
- Volunteer technical advisor, Danish Red Cross data literacy programme
