A little about me My path has never been straight forward, and I thrive on that. I am naturally curious and learn best by diving into practice. This approach has led me through an M.Sc. in Data Science, and most recently to a thesis in collaboration with Danske Bank on the implementation and adoption of generative AI. I am passionate about the interdisciplinary interplay between technology, business, and people, especially where technology becomes meaningful in practice and can create value across contexts and cultures.

Competences

- Machine Learning
- Data Mining & Predictive Analytics
- Business Analytics
- Data Engineering
- Artificial Intelligence in Business

Educational background

2024 - 2026 Data Science (MSc) GPA: 10.7

Copenhagen Business School My master's degree in Data Science combines advanced analytical methods with a strong understanding of business challenges. Through the program, I have learned to translate complex data into actionable insights and to work with how data-driven solutions are developed and implemented to create value within organizations.

- My thesis was written in collaboration with Danske Bank on their implementation and adoption of Generative AI, which we completed with a top grade of 12.
- Each semester, I collaborated with various companies as part of project work, including Danske Bank, Normal, and Texta. This gave me valuable hands-on experience in real-world work.

Exchange in England

2023 Aston University, Birmingham During the fourth semester of my bachelor's degree at Copenhagen Business School, I developed strong collaboration skills through working in international study environments with students from diverse cultural backgrounds.

2021 - 2024 Business Administration in Business Administration GPA: 11
and Digital Management (BSc)

Copenhagen Business School My bachelor's degree in Business Administration and Economics from Copenhagen Business School has provided me with strong analytical skills and a solid understanding of how businesses operate across markets and industries. Through the program, I developed the ability to analyse business challenges and apply economic and strategic perspectives to create value in organisational contexts.

2015 - 2018 High School education STX

Hellerup Gymnasium English and Social Studies track, 5 A-level subjects with an elective in Mathematics at A-level.
