PROFILE

Engineering master's student at DTU with a deep interest in supply chain optimisation, lean operations, and the application of advanced analytics in industrial settings. Through my work at Vestas, I have gained hands-on experience with supply network design and the practical challenges of scaling operations across geographies. I am drawn to consulting because of the opportunity to combine technical depth with strategic problem solving.

WORK EXPERIENCE

Vestas Wind Systems · Aarhus

Supply Chain Analyst Intern · Full-time internship · Feb 2025 – Aug 2025

- Built a logistics simulation model in Python for a new factory ramp-up
- Identified €4.2M in annualised cost savings across inbound logistics
- Presented recommendations to the SVP of Global Operations

Novo Nordisk · Bagsværd

Student Assistant, Manufacturing Excellence · Part-time · Sep 2023 – Jan 2025

- Supported continuous improvement projects on aseptic filling lines
- Performed root-cause analysis using Six Sigma DMAIC framework

REMA 1000 · Lyngby

Stocker · Part-time · Mar 2018 – Aug 2020

VOLUNTEER WORK

Member, Polyteknisk Forening · Sep 2020 – Present

Active member of DTU's student organisation.

MASTER'S THESIS

Digital Twin Models for Capacity Planning in Wind Turbine Manufacturing

EDUCATION

MSc in Engineering – Operations Management

DTU · 2024-2026

GPA: 10.1

BSc in Engineering – Mechanical Engineering

DTU · 2020-2023

GPA: 9.4

Exchange

ETH Zürich

Autumn 2024

TECHNICAL

- Python (advanced)
- MATLAB
- AnyLogic
- AutoCAD
- Power BI
- SAP S/4HANA
- Excel

PROFESSIONAL

- Process mapping
- Six Sigma (Green Belt)
- Project management
- Technical communication

LANGUAGES

- Danish (native)
- English (fluent)
- German (intermediate)
