7 October 2025

Dear Accenture Hiring Team,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Digital Innovation and Management at ITU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Management Consulting Analyst role sits.

I am a iTU graduate combining a strong technology foundation with a focus on how organisations design, scale and govern digital operations. My internship at Maersk and student role at Trustpilot have shown me how data and platforms reshape supply chains and customer operations. I want to apply this perspective in management consulting, where the gap between digital ambition and operational reality is often where the real value lies.

My most recent role as Digital Operations Intern at Maersk has shaped my interest in this work in concrete ways. Supported the rollout of a new container booking platform across 4 regions. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What attracts me to Accenture's consulting practice is the combination of strategic and implementation work for some of the largest organisations in the Nordics. The opportunity to apply hands-on problem solving in real client environments, while still developing depth in the areas I care most about, is rare — and exactly what I am looking for as I move from study into a full-time role.

I am open to working across Accenture Consulting's Industry practices (Financial Services, Resources, Life Sciences, Consumer Goods & Services, Health & Public Services) and Functional practices (Talent & Organization, Supply Chain & Operations). That said, my background and interests align particularly with the **Supply Chain & Operations** practice, and I would welcome the opportunity to be considered for it as a primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Management Consulting Analyst team.

Warm regards,

Ida Toft-Nielsen
