WHAT I BRING

- Analytical and structured mindset.
- Hands-on, hypothesis-driven problem solving.
- Comfort with ambiguity and learning curves.
- Strong written and oral communication.
- Cross-functional teamwork.
- GPA of 9.9 from SDU.
- International outlook from exchange and work.

APPLYING TO

Accenture
Management Consulting
Analyst
Copenhagen, Denmark

LETTER OF MOTIVATION

Cecilie Thrane · Management Consulting Analyst graduate position

Dear Hiring Team at Accenture,

I am writing to apply for the Management Consulting Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Engineering Management at SDU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Management Consulting Analyst role sits.

I am an engineering management master's student at SDU with a hands-on background in industrial automation. My work at Universal Robots gave me practical insight into how operations and product strategy intersect, and my recent project with Aarhus Vand on water-utility optimisation has shown me how operations consulting creates measurable outcomes for clients.

My most recent role as Student Engineer, Operations at Universal Robots has shaped my interest in this work in concrete ways. Built a constraint-based scheduler for the cobot assembly line. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What attracts me to Accenture's consulting practice is the combination of strategic and implementation work for some of the largest organisations in the Nordics. The opportunity to apply hands-on problem solving in real client environments, while still developing depth in the areas I care most about, is rare — and exactly what I am looking for as I move from study into a full-time role.

I am open to working across Accenture Consulting's Industry practices (Financial Services, Resources, Life Sciences, Consumer Goods & Services, Health & Public Services) and Functional practices (Talent & Organization, Supply Chain & Operations). That said, my background and interests align particularly with the **Supply Chain & Operations** practice, and I would welcome the opportunity to be considered for it as a primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Management Consulting Analyst team.

Warm regards,

Cecilie Thrane
