

Cecilie Thrane

MSc in Engineering Management

PROFILE

Engineering management master's student at SDU with a hands-on background in industrial automation. My work at Universal Robots gave me practical insight into how operations and product strategy intersect, and my recent project with Aarhus Vand on water-utility optimisation has shown me how operations consulting creates measurable outcomes for clients.

EXPERIENCE

Student Engineer, Operations

Universal Robots, Odense · Part-time · Sep 2023 – Present

- Built a constraint-based scheduler for the cobot assembly line
- Reduced changeover time by ~20% on a critical work cell
- Trained operators in updated workflows

Project Engineer Intern

Aarhus Vand, Aarhus · Full-time internship · Feb 2025 – Jul 2025

- Modelled energy use across pumping stations and proposed savings
- Coordinated stakeholder meetings across operations and IT

Cashier

Bilka, Odense · Part-time · Aug 2018 – Aug 2020

VOLUNTEER

Volunteer mentor, SDU's Female Engineers network · Sep 2023 – Present

Mentor first-year female engineering students.

MASTER'S THESIS

Energy Optimisation in Water Utility Operations: A Mixed-Integer Programming Approach

EDUCATION

MSc in Engineering Management

SDU, 2024-2026

GPA: 9.9

BSc in Engineering – Mechatronics

SDU, 2020-2023

GPA: 9.2

Exchange

TU Munich

Autumn 2024

LANGUAGES

Danish (native)

English (fluent)

German (intermediate)

TECHNICAL

Python, MATLAB, ROS, AutoCAD, Power BI, AnyLogic, SQL

PROFESSIONAL

Operations analysis, Cross-functional collaboration, Technical documentation, Workshop facilitation
