

Maja Lystrup

MSc in Computer Science (Machine Learning track)

PROFILE

Computer science master's student at KU specialising in machine learning. I bring a strong technical foundation, professional experience at Deepl and the Alexandra Institute, and a curiosity about the strategic implications of AI. I am applying to Strategy because I want to be in the rooms where AI is shaping companies' futures, not only in the rooms where the models are built.

EXPERIENCE

Student Researcher, AI for Business

Alexandra Institute, Aarhus · Part-time · Sep 2024 – Present

- Worked on applied ML projects with Danish SMEs
- Built MLOps pipelines on Azure for client demos
- Contributed to a public report on AI maturity in Danish SMEs

ML Intern

Deepl, Copenhagen · Full-time internship · Feb 2025 – Aug 2025

- Worked on evaluation methodologies for translation quality
- Contributed to a research project on long-context summarisation

Cashier

Bilka, Lyngby · Part-time · Aug 2017 – Aug 2020

VOLUNTEER

Coach, Coding Pirates Copenhagen · Sep 2023 – Present

Volunteer coach for kids learning programming.

MASTER'S THESIS

From Pilot to Production: A Field Study of MLOps Maturity in Danish SMEs

EDUCATION

MSc in Computer Science (Machine Learning track)

KU, 2024-2026

GPA: 10.6

BSc in Computer Science

KU, 2020-2023

GPA: 10.0

Exchange

ETH Zürich
Autumn 2024

LANGUAGES

Danish (native)
English (fluent)
German (basic)

TECHNICAL

Python, PyTorch, JAX, SQL,
Spark, Azure, AWS, Hugging
Face, Kubernetes

PROFESSIONAL

Technical communication,
Cross-functional collaboration,
Research-to-product
translation, Model evaluation
