Profile

AAU master's student in mathematical engineering with a strong statistics and data science focus. My role at Bankdata and my project work with Aalborg Forsyning have given me hands-on experience taking data and AI from idea to implementation in regulated and operational contexts. I am drawn to Accenture Strategy's Data & AI practice for the variety of clients and problems.

Education

AAU

MSc in Applied Mathematical Engineering – Statistics and Data Science

2024-2026

GPA: 10.5

AAU

BSc in Mathematics-Economics

2020-2023

GPA: 10.1

Exchange semester at KTH Royal Institute of Technology (Spring 2022)

Experience

Data Science Intern · Bankdata, Fredericia

Full-time internship · Feb 2025 – Aug 2025

- Built and validated a credit-risk model for SME exposures
- Created internal documentation on responsible-AI controls
- Worked closely with model risk management

Student Analyst · Aalborg Forsyning, Aalborg

Part-time · Sep 2023 – Jan 2025

- Built load-forecasting models for district heating
- Supported regulatory reporting on grid losses

Cashier · Coop, Aalborg

Part-time · Aug 2017 – Aug 2020

Volunteer

Tutor, AAU Math Outreach · Sep 2022 – Present

Tutors high-school students in math.

Skills

Technical

Python, R, PyTorch, SQL, Spark, Azure, Stata, MATLAB

Professional

Quantitative analysis, Model documentation, Regulatory awareness, Cross-functional translation

Languages

Danish (native), English (fluent), Swedish (working)

Master's Thesis

Calibrated Uncertainty in Energy Demand Forecasting: A Bayesian Approach
