Dear Accenture Strategy & Consulting Hiring Team,

I am writing to apply for the Strategy Analyst graduate position at Accenture Strategy & Consulting, with a planned start in September 2026. I will complete my MSc in Engineering – Digital Innovation and Management Engineering at DTU in summer 2026 and am excited by the opportunity to begin my career at the intersection of business and technology — exactly where the Strategy Analyst role sits.

I am a dTU master's student bridging design, technology and management engineering. My professional experience at LEO Innovation Lab and KMD has given me both startup and large-enterprise perspectives on how technology agendas are set and executed. I am drawn to Accenture's Technology Strategy & Advisory because of its mix of architecture-level rigour and human-centred thinking.

My most recent role as Technology Strategy Intern at KMD has shaped my interest in this work in concrete ways. Supported the development of a multi-cloud reference architecture. The exposure to real business problems, in a structured environment, showed me how analytical work translates into tangible outcomes — and reinforced my motivation to continue in consulting.

What draws me to Accenture Strategy is the chance to work where corporate strategy and technology meet — across industries, with senior stakeholders, and with the analytical rigour I have built throughout my degree. The Nordic Strategy community's emphasis on diverse perspectives and continuous development matches the kind of environment in which I do my best work.

At Accenture Strategy, I would welcome being considered across Technology Strategy & Advisory, CFO & Enterprise Value, Industry Strategy, and Data & AI. Given my profile and interests, I am especially drawn to the **Technology Strategy & Advisory** practice and would value being considered for it as my primary preference.

I am able to take part in the bootcamp in Copenhagen, and I will have completed my master's degree before September 2026. Thank you very much for considering my application — I would be delighted to discuss in more detail how I could contribute to Accenture's Strategy Analyst team.

Kind regards,

Esther Rohde
